DETAILED ACTION

Claims 1-20 are pending.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-19, drawn to a composition and a method for suing the composition that comprises an isolated nucleotide sequence encoding an immunogen and an isolated nucleotide sequence encoding one or more transcriptional factor listed in claims 1, 7 and 15.

2. Group II, claim(s) 20-21, drawn to a live attenuated pathogen and a method for using the pathogen, which comprises nucleotide sequence that encoding one of more proteins listed in claim 20. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technique feature related to a composition comprising two nucleotide sequences, one encodes an immunogen and another encodes one or more a transcriptional fact protein has been known in the art as evidenced by Kruse et al. (Proc. Natl. Acad. Sci. USA, 1997, Vol. 94, pp. 12396-12400) and Kerppola et al. (EMBO J. 1997, Vol. 16 (10), pp. 2907-2916).

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows: Please select one of the protein listed in clams 1, 7, 15 or 20

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An

Art Unit: 1648

argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Claims 1, 7, 15 and 20 contain species

The following claim(s) are generic: 1, 7, 15 and 20 are generic.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species c-fos and/or jun as well as PA-1 expressed as a fusion protein with another immunogen as evidenced by the two references cited above.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
